

CLASS UP – My Social School Calendar

A project by Lujan and Perez

The Problem Students Need to Solve

Many students frequently **forget important school events** due to busy schedules and scattered notifications. A simple, social solution can help keep everyone connected and informed about upcoming activities and deadlines.

Combining Calendars and Social

A social approach to scheduling events

Calendar Integration

Class Up seamlessly combines a **calendar** with social networking features, allowing students to stay informed about important school events while maintaining a sense of community and connection.

Reminder Posting

Students can easily post reminders for upcoming events, ensuring that their peers receive timely notifications and can participate in **school activities** more actively, fostering engagement.

Social Interaction

The app enables everyone to comment and like posts, promoting interaction among students and creating a lively environment where friendships and connections can flourish effortlessly.

Key Features of Class Up

Class Up offers essential features like posting reminders, commenting and liking posts, connecting with classmates, and providing real-time updates, ensuring students are always informed and engaged in their school activities.

Design and Technology Overview

Class Up was built using **HTML**, **CSS**, and **JavaScript** for the front-end, while employing **PHP** and **MySQL** for backend functionality, ensuring a simple and friendly user experience throughout the app.

Class Up in Action!

Future Enhancements for Class Up

Upcoming features include **notifications** for important events, a **mobile version** for on-the-go access, and customizable **user profiles** to enhance interaction and personalization within the app.

Thank you!
